By Simon Guy, Elizabeth Shove : The Sociology of Energy, Buildings and the Environment: Constructing Knowledge, Designing Practice (Routledge Research Global Environmental Change Series, 5)

most commentators expect improved energy efficiency and reduced energy demand to provide the dominant contribution to tackling global climate change an analysis of how people make decisions offering practical guidance for making efficient and effective decisions The Sociology of Energy, Buildings and the Environment: Constructing Knowledge, Designing Practice (Routledge Research Global Environmental Change Series, 5):

0 of 0 review helpful Fascinating Subject By Claudia This is a most fascinating and well written account of what would seem to be a most dry and uninteresting subject Simon Guy brings to life the subject of insulation explaining why people have resistance to change even when the change might be beneficial in the long run The subject of this book applies well to the challenge of climate change and why it is so difficult Bringing the social sciences to the heart of environmental debate this book demonstrates the relevance of sociological analysis for environmentally critical issues like energy consumption Focusing on energy efficiency and the built environment the authors take a critical look at the production and use of technical knowledge and energy related expertise Challenging the conventional assumptions of scientists and energy policy makers the book outlines a new role for so interesting and illuminating book Claire Haggett Journal of Environmental Planning and Management
