The fit for purpose of the built environment has been a focus of attention since classical times both in the West and in the East. However, an explicit focus on sustainable buildings is relatively new. The last two decades, in particular, have seen an explosion of published material on the design, construction, and assessment of buildings purported to be sustainable. Many governments and owners of buildings now routinely require about the author Rohinton Emmanuel is a Reader in Sustainable Design and Construction and the Director of the Centre for Energy and the Built Environment at Glasgow Caledonian University. As an architect with urban design interests, he has pioneered the inquiry.
