By Steven V. Szokolay : Introduction to Architectural Science types a wide range of hard landscape materials can be used such as brick gravel rock or stone concrete timber bitumen glass metals etc the term gulag is an acronym for the soviet bureaucratic institution glavnoe upravlenie ispravitelno trudovykh lagerei main administration of corrective Introduction to Architectural Science:

2 of 2 review helpful Covers all the technical aspects By David A good book Covers all the technical details for doing calculations However lacks a little in the inspiring design ideas department book could do with a fourth section that

has real world examples and sketches of innovative uses of the technical knowledge Perhaps with examples of how well said design worked in the real world 2 of 2 review helpful Introducing the basics of architectural science this book is an ideal reference providing an understanding of the physical basis of architectural design The knowledge gained from this book equips the reader with the tools to realize the full potential of the good intentions of sustainable bioclimatic design All sections have been revised and updated for this second edition including more information on small scale energy generation method About the Author Dr Steven Szokolay runs his own practice as an energy and environmental consultant and is also both honorary associate professor at the University of Queensland and a supervisor of postgraduate research students He has experience in architect
