1 of 1 review helpful Don t miss out on this book because you already grow and eat kale chard spinach By Jeanne M Wallace PhD CNC After purchasing this book it sat forgotten on my nightstand for nearly a year as I read several other items on my list Every time I picked it up I thought not now I already know about eating and growing my greens As a nutritionist and permaculturist I m already eating a wide arra Our industrialized food system is failing us and as individuals we must take more responsibility for our own health and food security Leaf crops produce more nutrients

per square foot of growing space and per day of growing season than any other crops and are especially high in vitamins and minerals commonly lacking in the North American diet As hardy as they are versatile these beautiful leafy vegetables range from the familiar to the exotic Some part of th With wit and reason Kennedy makes a compelling case based on sound nutritional and sustainability grounds to start producing and eating more greens Delicious leafy green vegetables grown at home can effectively fill voids left by the industrial foo
