By Charles P. Ries, Joseph Jenkins, Oliver Wise : Improving the Energy Performance of Buildings: Learning from the European Union and Australia (Technical Report (RAND)) improving the energy performance of buildings learning from the european union and australia technical report rand charles p improving the energy performance of buildings learning from the european union and australia Improving the Energy Performance of Buildings: Learning from the European Union and Australia (Technical Report (RAND)):

This study examines how policies to increase energy efficiency in buildings in the European Union and Australia have worked and draws implications for the design of similar public policies for the United States. It appears that effective policies to promote energy efficiency can be devised using information disclosure, building codes, financial incentives, and benchmarking. Insights are presented to help designers of analogous U.S. policies. From the Inside Flap: A review of recent European and Australian experience in the design and implementation of policies to improve energy efficiency of buildings and insights to aid U.S. designers of analogous policies.
