By James Kachadorian : The Passive Solar House: Using Solar Design to Heat and Cool Your Home (Real Goods Independent Living Book) the upcoming total solar eclipse is a major event for astronomers but the lead up to the big day is a cartographers dream from the simple slash of the path of on august 21st millions of earthlings will gather to watch as a total solar eclipse sweeps across the centerline of the united states over the course of 90 minutes
The Passive Solar House: Using Solar Design to Heat and Cool Your Home (Real Goods Independent Living Book):

9 of 10 review helpful Not a definitive book on passive solar By R Stamey Kachadorian knows passive solar building in New England and presents what he knows well Those looking to build in the southwest or southeastern United States or elsewhere could certainly benefit from passive solar principles but probably won't find much specific help here I am still looking for the book that presents the subject of passive solar This book offers a technique for building homes that heat and cool themselves in a wide range of different climates using ordinary building materials available anywhere and with methods familiar to all building contractors and many do it themselves A formerly patented design for author James Kachadorian's Solar Slab heat exchanger is now available for the use of anyone motivated by the desire to build a house that needs a backup furnace or air conditioner rarely if ever From Library Journal Published in concert with the Real Goods Trading Company of California this book explains in detail the whys and wherefores of a particular form of passive solar design formerly patented but now in the public domain The patent was held by
