interested in sustainable green architecture alan ness has designed green buildings and taught workshops in how to best create sustainable remodels and new region view filters satellite The Green House: New Directions in Sustainable Architecture:

0 of 0 review helpful Photos and text but no construction details By Jon H Thompson This book covers several ultra contemporary houses featured in an exhibit at the National Building Museum It contains a collection of color photos of each home along with text describing the approach each designer took in creating a sustainable building The book is therefore a catalog to an exhibit rather than a how to book providing co From the arid deserts of Tucson Arizona to the icy forests of Poori Finland to the tropical beaches of New South Wales Australia to the urban jungle of downtown Manhattan critics Alanna Stang and Christopher Hawthorne have traveled to the farthest reaches of the globe to find all that is new in the design of sustainable or green homes The result more than thirty five residences in fifteen countries and nearly every conceivable natural environment designed A book for the environmentally and aesthetically

conscious this book is as poignant as it is refreshing Loft Magazine September 2005 THE GREEN HOUSE will serve as a handsome resource guide and inspiration for designers and their cli
